TBGN Program Governance & Youth Opportunity Framework

Identity and legal relationship

The Becoming Global Network (TBGN) is an **initiative of RCCG Potter's House Kitchener**, not a separate registered charity. It supports education, mentorship, career readiness, digital skills and youth access to opportunities. All official fundraising representations must accurately identify the church as the charity and align with its registered charitable purposes.

Population and access

TBGN's network-wide target is ages **16 to 35**; a Becoming Labs pilot for roughly ages 25 to 35 is a pilot population, not a permanent eligibility limit. Program selection criteria must be documented and reasonably connected to an approved charitable objective. Distinguish church members from broader beneficiaries where relevant.

Programs

- **Becoming Summit:** speakers, learning, leadership, mentorship and network-building events. The 2026 event is complete; reconcile attendance, funds, sponsors and volunteer figures before reporting.
- **Becoming Labs:** practical education pathways including skills identification, AI and digital readiness, career navigation, entrepreneurship exercises, portfolio improvement and responsible fact checking.
- **Becoming Network:** mentors, volunteers, employers, educators and partner organizations supporting opportunity access.

SDG mapping

Relevant areas may include quality education (4), decent work (8), reduced inequalities (10), gender equality (5) and partnerships (17), depending on the actual funded activity. SDG mapping represents program relevance, not UN accreditation or proof that global outcome indicators have been achieved.

Budgeting and fundraising

Submit approved program briefs with charitable-purpose assessment, learning objectives, budgets, beneficiaries, risk, privacy, mentor requirements and reporting metrics. TBGN cannot issue its own tax receipts, own donation accounts or independently accept restricted gifts in the name of Potter's House. A donation designation is accepted only under church-approved terms.

Safeguarding and privacy

When minors participate, use the church's child protection standard. Protect participant resumes, immigration details, employment and educational histories, contact details and AI prompts containing personal data. AI output must be verified; users should not upload sensitive documents to unapproved services.

Evidence and reporting

Track program registration, attendance, completion, learner projects, volunteer service, mentorship sessions and follow-up opportunity outcomes. Do not count a connection or introduction as a job secured. Present 2026 Summit totals as verified only after reconciliation.
